SONEDEV

CAPABILITY STATEMENT

OCTOBER 2026

Managed IT · Managed Security · Strategic Leadership

Houston, TX | www.sonedev.com

COMPANY OVERVIEW

SoNeDev is a Houston-based Managed Service Provider (MSP) and Managed Security Service Provider (MSSP) delivering enterprise-grade IT infrastructure management, cybersecurity, and strategic technology leadership to small and mid-sized organizations. With deep expertise in regulated industries — financial services (CPA and RIA firms), professional services, and healthcare-adjacent organizations — SoNeDev bridges technical execution and business strategy with hands-on, personalized service national providers cannot match.

CORE COMPETENCIES

- Managed IT Services (MSP)
- Managed Security Services (MSSP)
- Virtual CIO (vCIO) Advisory
- Virtual CISO (vCISO) Services
- Cloud & Migration (M365, Azure, Google Workspace)
- Endpoint Detection & Response (EDR)
- Network Design & Management (UniFi, Cisco, Firewall)
- Compliance & Risk Assessment (NIST, CIS)
- Business Continuity & Disaster Recovery
- Data Backup & Recovery
- VoIP & Unified Communications
- Onboarding & Offboarding Automation
- Security Awareness Training
- Vendor & Contract Management

DIFFERENTIATORS

01 Strategic Leadership, Not Break-Fix
vCIO/vCISO services align IT with business goals, risk, and regulation.

02 Regulated Industry Expertise
CPA, RIA, and professional services under SEC, FINRA, and IRS Pub. 4557.

03 Cybersecurity-First Approach
Baseline assessment, layered defenses, and ongoing threat monitoring.

04 Local, Responsive, Accountable
Houston team, no offshore hand-offs, named account ownership.

PAST PERFORMANCE

CPA Firm IT Modernization — Houston, TX
Migrated a multi-partner CPA practice from on-premise servers to Microsoft 365 and Azure with MFA, email security, and role-based access to meet IRS Pub. 4557; zero-downtime cutover with staff training.

RIA Firm MSSP Engagement — Financial Services
Ongoing EDR, vulnerability scanning, and quarterly vCISO reviews aligned with SEC cybersecurity expectations; documented incident response plan and annual risk assessment cycle.

SMB Network Overhaul — Professional Services **>90% less downtime**
Designed and deployed segmented network architecture with enterprise UniFi switching and next-generation firewalls, sharply improving data segmentation posture.
